

200-VRT-1000

This knife has the same 1" (25mm) tip as the 200-VRT-1011. The high chrome cast tip has a double carbide insert that protects the bottom 2" (50mm) of the tip. Because of the near vertical approach, this opener will pull harder than conventional knives, however it will throw less soil and pull out fewer rocks.

It should be used with the Bourgault 300 series seed boot system using attachment 300-ATM-1031 to achieve proper seed placement.

Driver 200-DRV-1030 should be used to protect the tip when installing this knife.

Product Number :	200-VRT-1000
Type of operation:	Seeding
Shank Type :	200 Series adapter
Bolt-On or Speed-Loc :	Speed-Loc
Seeding:	Single-Shoot
